QUARTZ

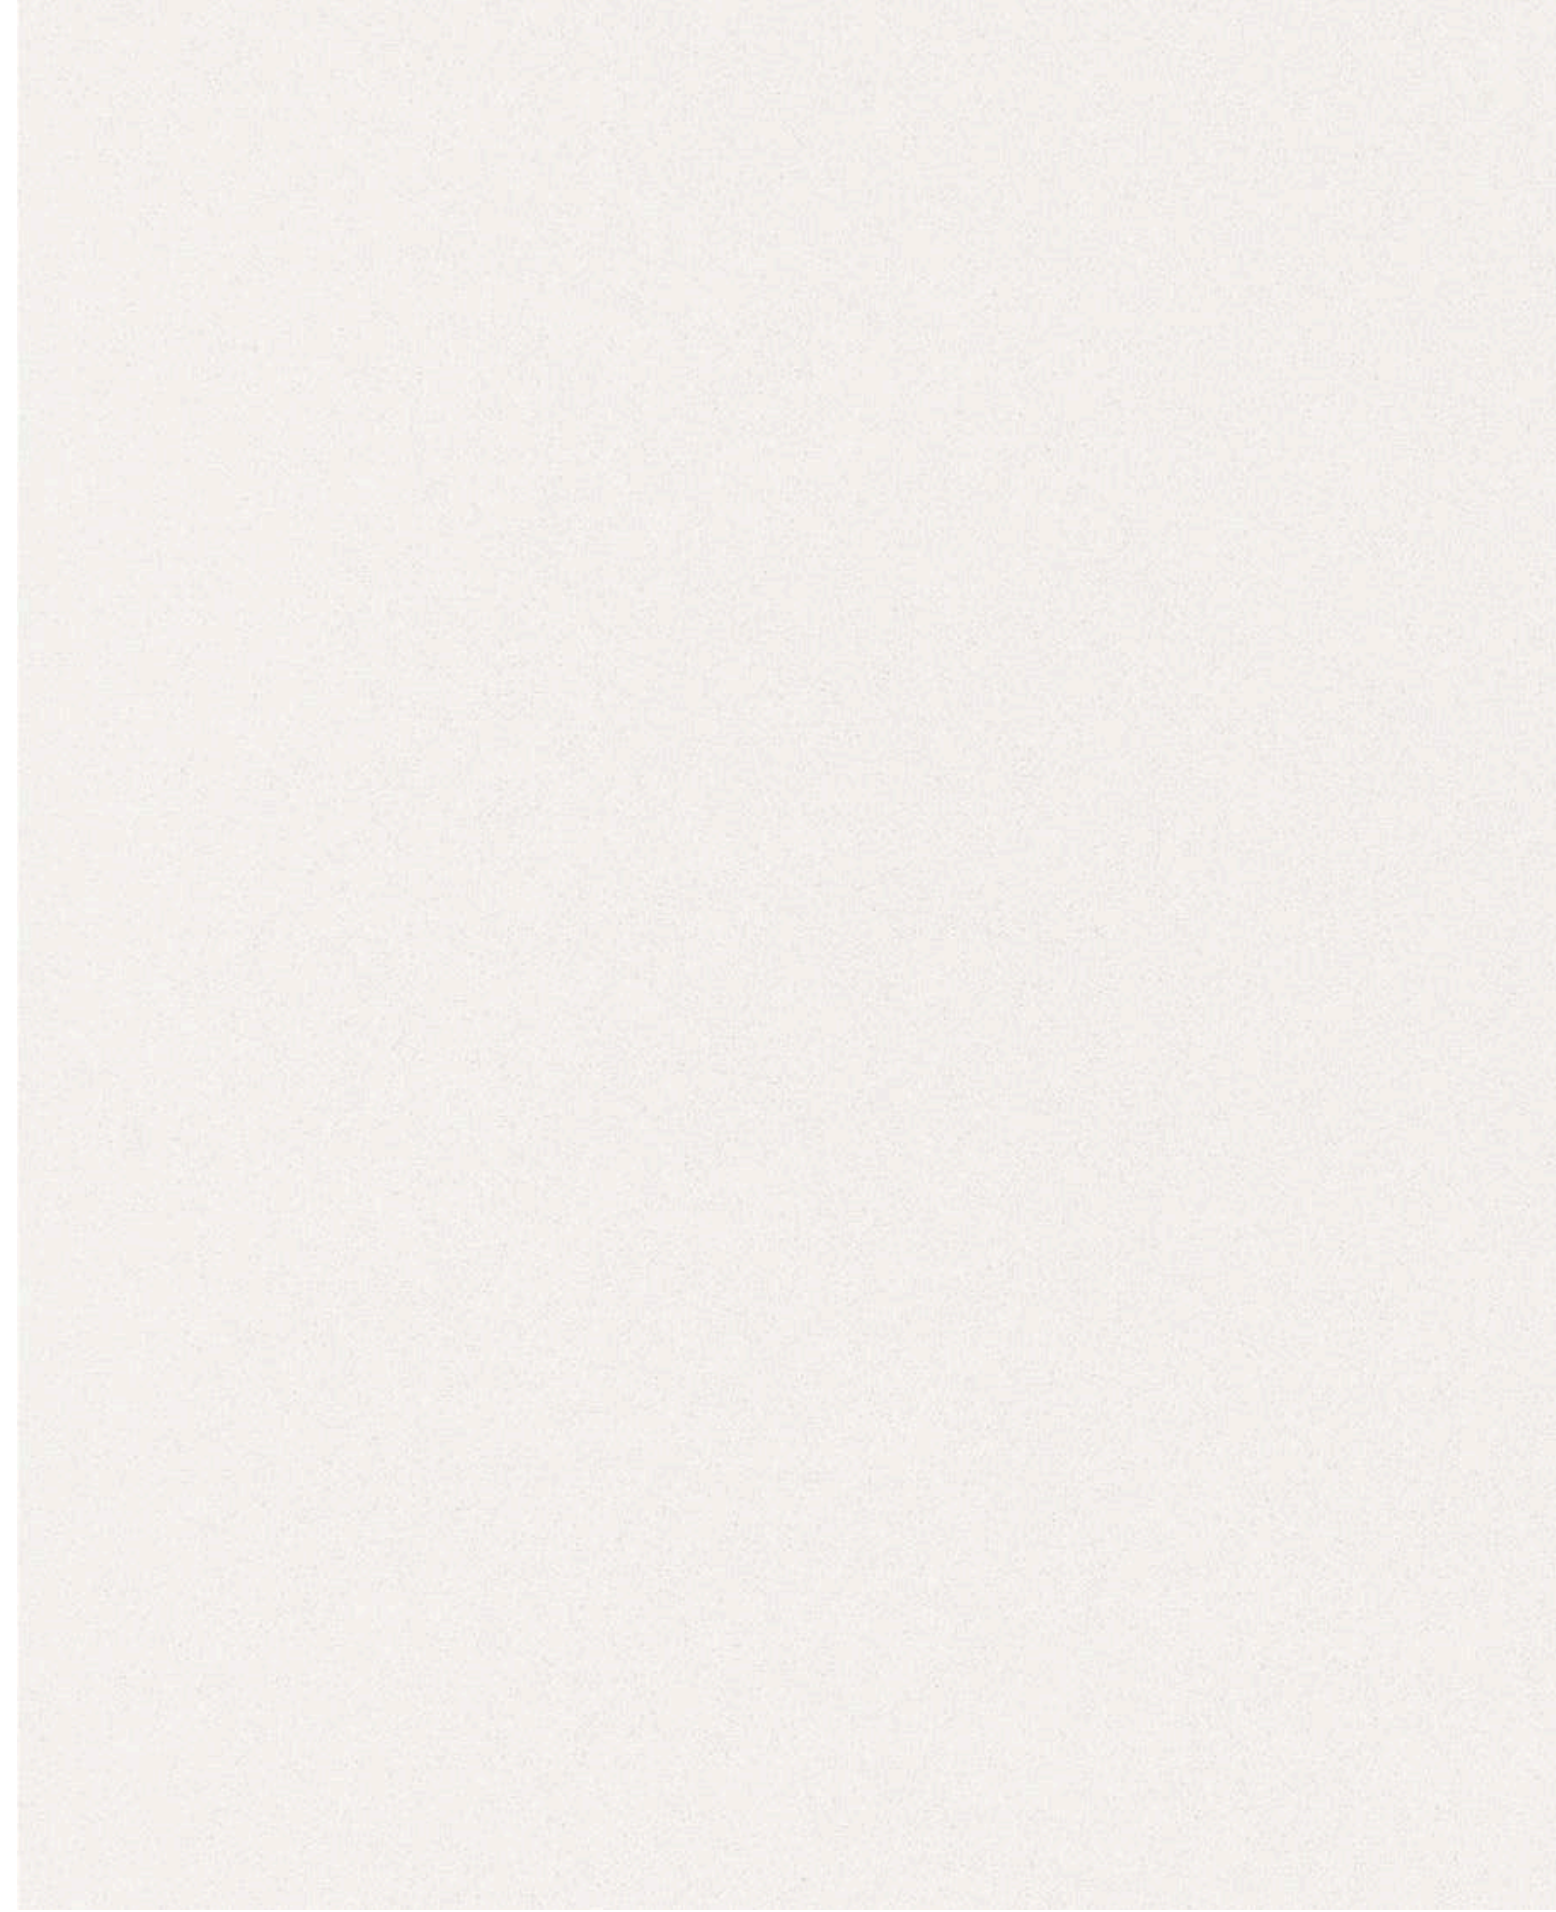

A blurred background image showing a wooden tray with a candle and fruit on a light-colored surface. The text is overlaid on the lower half of the image.

Quartz is one of the most common natural stones on earth. Quartz stones have many varieties according to their crystal structures and colors; Today, there are also areas of use such as industry. Since ancient times, quartz stone varieties have been among the most used minerals in the making of jewelry and hardstone carvings, especially in Eurasia. Quartz is not easily affected by climate and environmental conditions
